Advanced Physician & Nurse Recruitment and Selection Course

Ref: 20221368_1391-29 **Date:** 30 **Location:** Vienna (Austria) **Fees:** 5200 GBP

Why This Course

Healthcare organizations around the world face increasing challenges in attracting and retaining highly skilled physicians, nurses, and clinical specialists. With rising demand, workforce shortages, and growing competition between healthcare providers, traditional recruitment methods are no longer enough.

The Advanced Healthcare Recruitment Strategies Executive Program offers a focused 1-week pathway for healthcare recruiters and HR professionals who aim to elevate their recruitment practice. This program blends cutting-edge sourcing techniques, competency-based assessment tools, employer branding strategies, and data-driven decision-making to help participants build resilient and effective recruitment systems.

Through real healthcare scenarios, hands-on exercises, and modern talent acquisition tools, participants will learn how to identify, engage, and retain top clinical talent in today's fast-changing healthcare environment.

What You'll Learn and Practice

By the end of this program, participants will be able to:

- Develop advanced sourcing strategies to attract top physicians, nurses, and clinical professionals
- Apply competency-based interviewing and assessment methods with confidence
- Build compelling employer value propositions tailored to healthcare environments
- Implement best practices in candidate selection and long-term retention
- Use data and analytics to optimize the recruitment lifecycle and improve hiring decisions

The Program Flow

Day 1 - Advanced Sourcing Strategies

- Innovative and proactive sourcing methods for healthcare talent
- Using social media, online platforms, and professional networks effectively
- Developing and maintaining strategic talent pipelines
- Targeted recruitment marketing and outreach campaigns

Day 2 - Competency-Based Selection

- Designing competency frameworks for clinical and nursing roles
- Advanced interviewing methods
- Behavioral and situational assessment techniques
- Integrating psychometric testing into healthcare recruitment

Day 3 - Employer Branding & Value Proposition

- Building a strong and credible employer brand for healthcare organizations
- Crafting differentiated value propositions for various medical roles
- Enhancing candidate experience throughout the recruitment journey
- Effective communication techniques to engage healthcare candidates

Day 4 - Data-Driven Recruitment

- Key recruitment metrics and KPIs for healthcare organizations
- Applying predictive analytics in talent acquisition
- Using AI and machine learning to streamline recruitment
- Optimizing hiring processes through data interpretation and analysis

Day 5 - Retention Strategies & Future Trends

- Innovative onboarding practices for long-term success
- Designing effective retention programs for clinical talent
- Future trends shaping healthcare recruitment
- Developing long-term, organization-wide talent strategies

Individual Impact

Participants will leave equipped to:

- Build a high-impact sourcing and recruitment strategy for their organization
- Conduct structured, competency-based interviews with improved accuracy
- Create a compelling employer value proposition that attracts top medical talent
- Use data and analytics to refine and enhance recruitment performance
- Lead recruitment initiatives with modern, evidence-based practices

Organizational Impact

Organizations will benefit from professionals who can:

- Recruit high-quality clinical and nursing talent with greater efficiency
- Improve the overall candidate experience and organizational attractiveness
- Reduce turnover by implementing modern retention strategies
- Strengthen workforce planning and long-term talent pipelines
- Build a recruitment process aligned with industry trends and standards

Training Methodology

The program applies a practical, experience-based learning approach through:

- Real-world case studies from healthcare recruitment challenges
- Hands-on exercises and role-play interview simulations
- Data analysis and recruitment dashboard development
- Group activities and peer learning discussions
- Interactive sessions using modern recruitment technologies

Beyond the Course

Participants will return ready to:

- Implement comprehensive sourcing and selection strategies
- Build competency-based assessment tools for key roles
- Develop employer branding initiatives that resonate with clinical talent
- Use analytics to continuously improve recruitment outcomes
- Strengthen retention and long-term talent management practices
