Comprehensive PMP Certification Exam Preparation Course

Ref: 20221113_152615 Location: Paris (France) Fees: 9400 GBP

Why This Course

Earning the Project Management Professional PMP® certification is a major milestone for project professionals—and one that requires more than memorizing concepts. Today's PMP® exam emphasizes situational judgment, Agile and hybrid practices, leadership capability, and the ability to apply project management principles in real-world scenarios.

The **PMP® Certification Preparation & Project Management Mastery Program** is an intensive two-week course designed to prepare participants thoroughly for both the PMP® exam and professional project management practice. The program covers all PMBOK® Guide knowledge areas, integrates Agile and hybrid approaches, and focuses heavily on exam-style questions and practical application.

By combining structured content review, hands-on exercises, mock exams, and proven exam strategies, the course builds deep understanding, confidence, and readiness for certification success.

What You'll Learn and Practice

By the end of this program, participants will be able to:

- Master PMBOK® Guide knowledge areas and process groups
- Apply Agile, predictive, and hybrid project management approaches
- Analyze and respond effectively to situational PMP® exam questions
- Strengthen critical thinking for complex project scenarios
- Apply best practices to real-world project challenges
- Use proven exam-taking strategies and time management techniques
- Approach the PMP® exam with confidence and clarity
