Day 4: Pest and Disease Management

- Integrated pest management strategies
- Biological control methods
- Cultural practices for disease prevention
- Organic-approved pest control products

Day 5: Sustainable Practices and Farm Management

- Water conservation techniques
- Energy efficiency in organic farming
- Record-keeping and farm planning
- Marketing organic produce

Practical Wins for Participants

- Develop a customized organic crop rotation plan
- Create a comprehensive soil fertility management strategy
- Design an integrated pest management program for organic crops
- Prepare an action plan for organic certification

UK Training
