Forex Daily Profit Strategy: Mastering Currency Trading

Ref: 2025227801213449 Duration: 28 Location: Tunis (Tunisia) Fees: 4200 GBP

Course Description

This comprehensive 1-week course equips traders with the knowledge and skills to implement a daily profit strategy in the forex market. Participants will learn advanced technical analysis, risk management techniques, and psychological principles to consistently capitalize on currency market movements. The course combines theoretical concepts with practical application to develop a robust trading approach.

Learning Objectives

- Develop a systematic approach to identifying high-probability trading opportunities
- Master advanced technical analysis techniques for precise market timing
- Implement effective risk management strategies to protect capital
- Cultivate the psychological mindset required for consistent profitability
- Create and optimize a personalized daily trading plan
- Apply real-time market analysis skills to adapt to changing conditions

Course Modules

Day 1: Foundations of Daily Forex Trading

- Understanding market structure and price action
- Key economic indicators and their impact
- Identifying trending and ranging markets
- Developing a daily trading routine

Day 2: Advanced Technical Analysis

- Multiple timeframe analysis for trend confirmation
- Advanced candlestick patterns and formations
- Fibonacci retracements and extensions
- Momentum indicators and divergence trading

Day 3: Risk Management and Position Sizing

- Calculating optimal position sizes
