2027 □□□□□□ 17 – 13
Tokyo (Japan)

Chartered Financial Analyst (CFA) Comprehensive Training

Ref: 20220806_214543 Duration: Tokyo (Japan) Fees: 5900 GBP

Course Description

This comprehensive 1-week course prepares finance professionals for the Chartered Financial Analyst CFA certification. Participants will gain in-depth knowledge of CFA exam topics, including ethics, quantitative methods, economics, financial reporting, corporate finance, equity, fixed income, derivatives, and portfolio management. Through expert instruction and hands-on practice, students will develop the skills needed to excel in financial analysis and investment management.

Learning Objectives

- Master ethical and professional standards in the investment industry
- Apply quantitative methods and economic concepts to financial analysis
- Analyze financial statements and corporate finance principles
- Evaluate equity, fixed income, and derivative investments
- Develop portfolio management and wealth planning strategies
- Prepare effectively for the CFA exam across all topic areas
