Construction Contracts Masterclass: Legal & Management Skills

Ref: 20222914_218948 Location: Baku (Azerbaijan) Fees: 5200 GBP

Course Description

This comprehensive 1-week masterclass equips professionals with advanced knowledge and skills in construction contract law and management. Participants will explore key legal principles, risk allocation strategies, and best practices for drafting, negotiating, and administering construction contracts. The course covers critical issues in contract formation, performance, and dispute resolution, providing practical insights for both clients and contractors.

Learning Objectives

- Understand fundamental principles of construction contract law and their practical applications
- Develop skills to draft, negotiate, and manage complex construction agreements effectively
- Learn strategies for identifying, allocating, and mitigating risks in construction projects
- Master techniques for preventing and resolving construction disputes efficiently
- Gain insights into emerging trends and best practices in construction contracting

Course Modules

Day 1: Fundamentals of Construction Contracts

- Overview of construction contract law
- Key elements and formation of valid contracts
- Standard form contracts FIDIC, JCT, NEC
- Contract interpretation and implied terms
