The Program Flow

Day 1: Global Energy Landscape and Historical Evolution

- Overview of the world energy system — past, present, and future trends.
- Evolution of global energy demand and resource distribution.
- Energy as a driver of industrialization and economic power.
- The rise of energy interdependence and transition challenges.
- Case study: The global oil shocks and their long-term impact.

Day 2: Energy Markets, Economics, and Policy Frameworks

- Structure and operation of international energy markets.
- Price mechanisms, supply chains, and energy trading systems.
- Role of OPEC+, IEA, and regional energy alliances.
- Energy subsidies, taxation, and regulatory frameworks.
- Workshop: Modeling supply-demand shifts under policy constraints.

Day 3: Geopolitics and Global Energy Security

- Energy security and strategic dependencies across regions.
- The influence of energy on diplomacy, trade, and conflict.
- Infrastructure and transport corridors — pipelines, LNG, and maritime routes.
- Emerging players: Africa, Asia-Pacific, and Latin America in the new energy order.
- Simulation: Strategic decision-making in a global energy crisis scenario.

Day 4: Energy Transition and Sustainability

- Climate change, carbon markets, and the Paris Agreement.
- Renewable energy economics: solar, wind, hydropower, and bioenergy.
- Technological innovations — hydrogen, carbon capture, and energy storage.
- Corporate ESG strategies and sustainable energy investments.
- Group project: Designing a national-level energy transition roadmap.

Day 5: Future of Energy and Strategic Foresight

- Digital transformation in energy — AI, IoT, and smart grids.
- Energy financing, investment trends, and green capital flows.
- The future of mobility: EVs, hydrogen transport, and electrification.
- Global scenarios for 2030-2050: balancing growth, innovation, and sustainability.
- Closing panel: Strategic leadership in the evolving world energy order.

UK Training

PARTNER

Individual Impact

- Develop a deep understanding of global energy systems and trends.
- Strengthen analytical and strategic skills for energy-related decision-making.
- Build the ability to assess policy, technology, and market interactions.
- Gain insight into sustainable investment and innovation opportunities.
- Enhance professional credibility in global energy and sustainability leadership.

Work Impact

- Support strategic planning and risk assessment for energy-focused organizations.
- Drive sustainability and decarbonization initiatives aligned with global standards.
- Anticipate market disruptions and policy shifts to guide investment and strategy.
- Improve collaboration between technical, policy, and financial teams.
- Position the organization as a proactive player in the global energy transition.

Training Methodology

This program integrates strategic analysis, scenario modeling, and interactive simulations to bridge global energy concepts with real-world practice.

Learning methods include:

- Expert-led sessions combining policy, economics, and technology.
- Data-driven workshops and energy market modeling exercises.
- Case studies on national and corporate energy transformation.
- Group discussions on geopolitics, climate, and innovation.
- Strategic foresight frameworks for anticipating future energy shifts.

Beyond the Course

Upon completion, participants will be equipped to interpret and influence the evolving global energy narrative — applying strategic foresight to guide investments, operations, and sustainability initiatives.

Graduates of this program will emerge as energy-aware leaders capable of connecting policy, innovation, and business intelligence to drive value in a fast-changing global energy environment.

A graphic of a chessboard with several pawns. In the foreground, a large gold king piece stands prominently. Behind it, a silver pawn and a gold pawn are visible. The background shows concentric circles emanating from the center of the board.
