Blackbird Project Management Professional Training Course

Ref: 20260409_233027 Duration: Jeddah (KSA) Fees: 4200 GBP

Why This Course

Projects are the primary vehicles through which organizations deliver strategy, innovation, and change. Yet many projects still struggle due to weak planning, unclear scope, ineffective communication, or lack of structured control. Successful project delivery requires more than technical knowledge—it demands a disciplined approach, strong leadership, and alignment with recognized global standards.

The **Project Management Professional PMP® Preparation & Project Management Excellence Program** is an intensive one-week course designed to provide a comprehensive understanding of project management principles, methodologies, and best practices. The program aligns with PMI® standards and supports participants in building both practical project management capability and exam readiness for the PMP® certification.

Through practical examples, structured frameworks, and applied exercises, participants gain the skills needed to manage projects confidently across industries and organizational environments.

What You'll Learn and Practice

By the end of this program, participants will be able to:

- Understand core project management concepts, methodologies, and PMI® standards
- Initiate, plan, execute, monitor, and close projects effectively
- Manage project scope, schedule, budget, quality, and risk
- Apply structured tools and techniques across the project lifecycle
- Strengthen leadership, communication, and stakeholder management skills
- Prepare confidently for the Project Management Professional PMP® certification exam

The Program Flow 1-Week Structure

Day 1 - Project Management Fundamentals

- Introduction to project management concepts and terminology
- Project lifecycle, process groups, and knowledge areas
- Overview of PMI® standards and frameworks
- Roles and responsibilities of the project manager

Day 2 - Project Initiation & Planning

- Quality planning and quality management techniques
- Procurement management and vendor coordination

Day 4 - Project Monitoring & Control

- Performance measurement and earned value management EVM
- Risk identification, analysis, and response strategies
- Integrated change control processes
- Issue tracking, escalation, and resolution

Day 5 - Project Closure & Professional Responsibility

- Project and phase closure activities
- Capturing lessons learned and knowledge transfer
- Professional ethics, responsibility, and PMI® code of conduct
- PMP® exam structure, question styles, and preparation strategies

Individual Impact

Participants will leave the program with:

- The ability to lead projects with confidence using industry-standard methodologies
- Stronger planning, execution, and control skills
- Improved stakeholder communication and leadership capability
- A clear understanding of PMI® frameworks and PMP® exam expectations
- Practical tools applicable immediately to real projects

Organizational Impact

Organizations will benefit through:

- More consistent and predictable project delivery
- Improved alignment between projects and strategic objectives
- Stronger governance, control, and risk management
- Enhanced collaboration across project teams and stakeholders
- Higher project success rates and professional project leadership

Training Methodology

The program uses a practical, exam-aligned learning approach, including:

- PMI®-aligned case studies and project scenarios
- Hands-on exercises and planning workshops
- PMP®-style questions and exam practice
- Tools, templates, and project management frameworks
- Expert-led instruction linking theory with real-world application

Beyond the Course

After completing the program, participants will be ready to:

- Lead and manage projects across different industries and complexities
- Apply structured project management practices consistently
- Support organizational project maturity and performance
- Sit for the PMP® certification exam with confidence
